About Us

Fibrecrete Preservation Technologies (FPT) manufactures and distributes premium construction materials that are specifically designed for the repair, restoration, and maintenance of parking garages, highways, bridges, and other concrete structures.

Our portfolio includes:

- Bridge Expansion Joint Repairs
- Hot Applied Flexible Repairs
- Concrete Repair Materials & Bedding Mortars
- Joint Sealants
- Epoxy Resin Mortars
- Protective & Waterproof Coatings
- High Friction Surfacing Systems
- ADA Tactile Paving Systems

FPT can assist agencies in the design of new materials and specifications to fix their specific needs. Our products are used in every climate and temperature zone in the United States and will perform under the most extreme conditions – from blistering heat in Laredo, Texas, to winter in Cleveland, Ohio, and everything in between.

At FPT we know how and when to install the products that we sell. With FPT, you get both material expertise and access to people who know how and why our products work. FPT products perform year after year and provide excellent value to DOTs, municipalities, and agencies that are responsible for structural preservation.

Covercrete
UV & Anti-Carbonation Coating for Concrete

Description
A decorative, waterborne acrylic coating designed to drastically reduce the diffusion rate of carbon dioxide into concrete and to provide a highly durable, weather resistant surface that will maintain its anti-carbonation properties over many years.

System Benefits
- Provides superior ingress protection to any structure
- Ready to use, rapid-drying formulation
- Excellent adhesion to all surfaces
- Damaged areas easily recoated and retreated
- Highly economical
- Easy to apply by brush or roller
- A sprayable grade is available also

Applications
- Parking garages
- Buildings
- Highway bridges
- Pedestrian bridges
- Stadiums
- Rail & bus stations
- Concrete water towers
Proflex A
Acrylic Waterproof Coating

Description
A high-build, waterborne elastomeric waterproof coating designed to impart a decorative semi-matte protective film to concrete. Protects concrete from the ingress of rain water and other waterborne pollutants and minimizes the possibility of carbonation.

System Benefits
- Excellent adhesion to most surfaces
- Prevents ingress of rain water while allowing the structure to breathe
- Flexibility allowing for minor expansion and contraction movement
- Low carbon dioxide permeability
- Adds protection to supplement inadequate reinforcement cover
- High UV and air pollution resistance

Applications
- Highly exposed concrete structures
- Building envelopes
- Parking garages
- Highway bridges
- Pedestrian bridges
- Stadiums
- Concrete water towers
- Building elements subject to minor cracking and movement
DeckProtect+
Versatile & Innovative Deck Coating Systems for Parking Garages

Description
DeckProtect+ is a range of cold liquid-applied systems that use the most effective technologies in parking garage protection. All DeckProtect+ systems are designed to be aesthetically pleasing, safe, and user friendly.

DeckProtect+ PmB - Fully protective waterproof & surface coating system for exposed parking decks and floors directly above accommodation.

DeckProtect+ Rapidflex - Rapid curing surface coating system for intermediate and underground parking decks

DeckProtect+ EPX - Durable epoxy-based surface coating system for intermediate and underground parking decks

System Benefits
• Exceptional crack bridging and elongation (PmB)
• Rapid curing - Ideal for a rapid return to service
• Excellent longevity
• Durable
• Excellent skid and slip resistance
• Quality aesthetics and color range
• UV stable and easy to clean

Applications
• Exposed decks & ramps
• Ramps & turning circles
• Underground & internal decks
